

Trainee dental Nurses

Tempdent accepts up to 80 people each year on our specifically run trainee dental nurse qualification classes.

We carefully select these trainees from hundreds of applicants & look for the following specific qualities;

- Previous work history which includes longevity in previous jobs, work ethics
- Previous training history – we look for achievement of courses.
- Attitude towards becoming a part of the dental profession
- Employability

We accept 40 trainees per year onto the **National Certificate** (new intakes every **May & November**) and 40 onto the **Diploma in Dental Nursing NVQ** (new intakes every **April & October**)

For the first couple of months we run a foundation course & teach them basic dental nursing skills & work with them on finding dental nursing employment.

We offer our trainee dental nurses to our clients as permanent staff, and **do not charge our clients for this service.**

All that we ask from you is the following;

- They are paid as permanent staff members from the commencement of their employment.
- They are released for their allocated training day once a week and for any exams and additional training that they may need.
- You support them as much as possible through their course – ie for National Certificate learners you sign their ROE forms & for NVQ nurses you allow them time with their assessor & work with us to ensure that the learner achieves their qualification in a timely manner.
- The trainee dental nurse works in a safe environment.
